

subdivision (a) can retroactively render a previously filed complaint untimely pursuant section 871.21.

That novel issue is not currently before this court. The only pending issue before this court is Defendant's motion to dismiss for discovery violations. This does not create a current risk of inconsistent rulings. Further, the balance of factors does not favor a stay. A stay at this time would not promote judicial economy or accommodate the ends of justice. Accordingly, the motion is denied.

Appearance required.

25CV-04165 Tamela Qualls vs Department of Motor Vehicles

Writ of Mandate

The petition for writ of mandate is DENIED.

As a fundamental vested right was at issue, the Court applied the independent judgment standard of review.

Upon review of the entire administrative record the Court finds: (1) there was no error of law; (2) Petitioner was provided a fair hearing; (3) the Department of Motor Vehicles' decision is supported by its findings of fact, which in turn are supported by the weight of the evidence; and (4) there was no abuse of discretion.
