

FL-21-001943 WRIGHT VS WRIGHT

County: stanislaus

Division: Family Law

Department: 11

Hearing date: 2026-07-28

Motion: Respondent's Request for Order re Motion to Quash Subpoenas, etc.—DENIED. Respondent offers no legal ground or basis for objection and Respondent's other allegations of impropriety as a basis for quashing otherwise validly served subpoenas within the scope of discovery are meritless and borderline vexatious. Procedurally, Respondent's motion does not comply with the Rules of Court for discovery motions and, among other things, there is no meet and confer declaration nor any particularized objections to the subpoenas at issue that would permit the Court to review the categories of documents sought and their discoverability versus any valid privileges or objections made by Petitioner.
