

**SUPERIOR COURT OF CALIFORNIA
COUNTY OF VENTURA**

Probate Notes

2025PRLP037783: IN THE MATTER OF JOSEPHINE MIAE OLSEN

08/25/2026 in Department J6

**Motion to Vacate Order, Or in the Alternative, to Terminate Conservatorship, or, in the
Further Alternative, to Remove Conservator and Appoint Successor Conservator**

The court intends to deny the motion to vacate the order appointing a limited conservator.

The court intends to deny the petition to remove the conservator and appoint a successor conservator.

As to termination of the conservatorship: A petition for termination of the CV may be filed by the conservatee's mother. (PC § 1861(a)(3).) The petition shall state facts showing that the CV is no longer required. (*Id.* at (b).)

The evidence provided with the petition fails to establish facts showing the conservatorship is no longer required. Ms. Wheeler states Josephine's placement at Triton Academy has removed Josephine from the diploma-track curriculum jeopardizing her future. That tinnitus is not a basis for a conservatorship, and that competent medical management has been lacking under conservator's care. The Court does not consider only one piece of evidence, or only certain information, but rather considers all evidence and information in determining to whether to grant a petition.
